## **DETAILED ACTION**

- 1. The finality of the previous Office Action dated 04/06/2004 has been withdrawn in view of new rejections on claims 6-8 and 15.
- 2. Claims 4-8 and 15 are under consideration in this Office Action.
- 3. The computer readable form (CRF) of the Sequence Listing dated 01/28/2005 has been received and have been processed by the Scientific and Technical Information Center (STIC).
- 4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a translation of the foreign application should be submitted under 37 CFR 1.55 in reply to this action.

## Claim Rejections - 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 6. Claim 6-8 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Dunican et al. (US Patent 6,797,509).

Claims 6-8 and 15 are drawn to an isolated DNA that hybridizes with SEQ ID NO: 2

Art Unit: 1652

under stringent conditions, wherein said DNA encodes a polypeptide with transaldolase activity, vectors comprising said DNA; host cells transformed with said vector; and method of making the polypeptide by culturing said host cells, wherein said polypeptide has at least 95% amino acid sequence homology to SEQ ID NO: 4.

Dunican et al. teach an isolated DNA (SEQ ID NO: 1) that encodes a polypeptide having transaldolase activity, where the said DNA has 98.7% identity to SEQ ID NO: 2 and therefore will hybridize to SEQ ID NO: 2 under the stringent hybridizations recited in claim 2 because of this high homology to SEQ ID NO: 2 (see enclosed Alignment No.1; and entire patent especially column 5, lines 35-42, and claims 3-5).

The reference also teaches vectors and host cells and method of overexpressing the polypeptide by culturing the host cells comprising said vector (see entire document and claims).

Therefore, Dunican et al. anticipates claims 6-8 and 15 of the instant application.

US Patent 6,797,509 claims priority to US Provisional Application No. 60/142,915, filed 07/09/1999, and is considered prior art, as defined by 35 U.S.C. 102(e), because US Provisional Application No. 60/142,915 discloses and has support for the isolated DNA (SEQ ID NO: 1) that encodes a polypeptide having transaldolase activity. The nucleotide sequence of SEQ ID NO: 1 is disclosed on pp.10-15 of US Provisional Application No. 60/142,915.

## Conclusion

- 7. Claims 4 and 5 are allowable.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christian L Fronda whose telephone number is (571)272-0929. The examiner can normally be reached Monday-Friday between 9:00AM 5:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura N Achutamurthy can be reached on (571)272-0928. The fax phone number for the organization where this application or proceeding is assigned is (571)273-8300.
- 9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
